

CATÁLOGO 2024

# A EVOLUÇÃO DA CALOTA

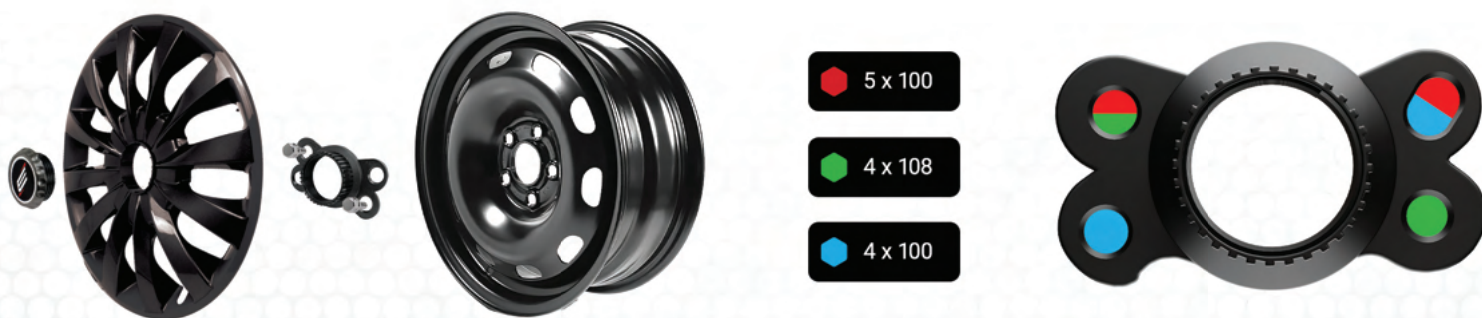

VEJA A LINHA  
COMPLETA EM:

## **SISTEMA DE FIXAÇÃO UNIVERSAL**

\*Rodas de 4 e 5 furos, cubo alto e baixo em um só produto.

## **CALOTAS PRODUZIDAS EM NYLON**

vantagens em comparação com outros tipos comumente usados de plásticos:

**Durabilidade:** O nylon é resistente e durável, sendo ideal para peças automotivas sujeitas a condições severas, como vibrações, impactos e altas temperaturas, prolongando assim a vida útil das calotas.

**Resistência à intempéries:** garantia de resistência em todos os ambientes. seu material a torna altamente resistente ao tempo e condições climáticas intensas, incluindo chuva ácida, exposição ao sol e ambientes agressivos.

**Flexibilidade e absorção de impacto:** O nylon é flexível e absorve impactos, ideal para peças automotivas como suportes e calotas.

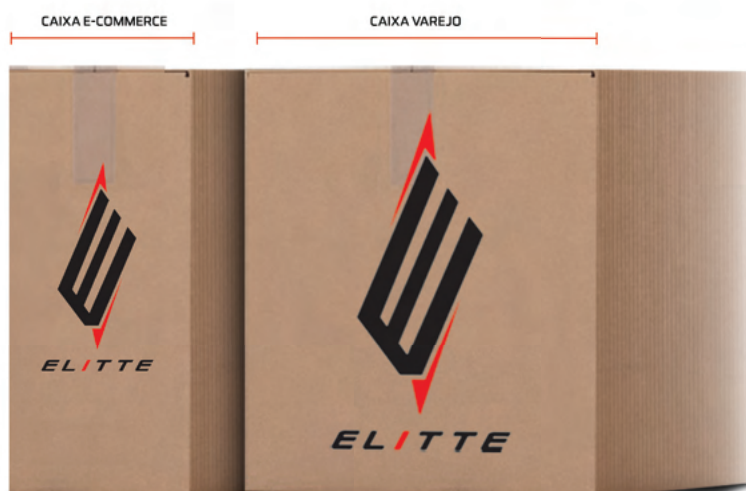

**Resistência térmica:** O nylon tem resistência superior ao aquecimento das rodas causado por uso excessivo dos freios, evitando a perda das calotas e garantindo maior durabilidade ao produto.

A única calota de reposição produzida totalmente em nylon, no Brasil!

## **ECONOMIZE ESPAÇO EM SEU ESTOQUE**

As calotas ELITTE ocupam menos espaço em seu estoque, otimizando sua logística, reduzindo seu custo de frete, pois, com apenas uma caixa das calotas ELITTE, você substitui cinco caixas de calotas
